## I. INTRODUCTION

EAGLE-X Token (GLXE) is an ERC20-compliant cryptocurrency based on deflationary tokenomics. Deployed on the Ethereum blockchain to power our social impact focused ecosystem, EAGLE-X is utilized to leverage innovations in blockchain technology to help underprivileged people in Africa access quality education, healthcare, and microfinance. Our mission is to undertake initiatives that help to alleviate poverty in some of Africa's poorest and under-served locales in terms of educational, social, financial, and healthcare resources. We endeavor to crowdfund educational development by upgrading local school resources including classrooms, libraries, and laboratories, and procuring books and utilities for children who cannot afford them. We endeavor to provide social and healthcare services to struggling and underdeveloped communities and cater to the needs of children and women. Another aspect of our operations involves the provision of grants for small businesses and scholarships for gifted students from elementary to university levels of education.

## II. SOCIAL IMPACT MARKET

### **Market Potential:**

The global market for social impact initiatives is rapidly growing, with increasing interest from individuals, businesses, and governments in addressing societal challenges. The total addressable market (TAM) for the social impact industry encompasses various causes, demographics, and geographies. According to a report by the Global Impact Investing Network, the estimated size of the global impact investing market was \$715 billion as of 2019. This figure includes investments in education, healthcare, microfinance, affordable housing, renewable energy, and other areas of need. EAGLE-X aims to tap into this market by providing a unique value

proposition that resonates with socially conscious investors and philanthropists. By combining the power of blockchain technology with *targeted replicable aid*, our project has the potential to attract a global community of supporters and create a sustainable funding model for social impact initiatives.

In a 2019 brief published by the National Center for Charitable Statistics, the nonprofit sector plays a significant role in the US economy, contributing over \$1 trillion and composing 5.6% of the country's GDP. 501(c)(3) public charities account for a significant portion of the sector's revenue, expenses, and assets. However, private charitable giving experienced a slight decrease in 2018 after several years of consecutive growth. On a positive note, volunteerism increased by 1.6% in 2017, with an estimated 8.8 billion hours contributed, valued at approximately \$195 billion. These trends highlight the importance of platforms like EAGLE-X, which aim to leverage technology and community engagement to drive social impact and address the needs of underprivileged communities. By facilitating transparent and secure financial transactions, EAGLE-X seeks to harness the power of crypto and blockchain to foster greater charitable giving and volunteer participation for long-term social change.

### III. THE PROBLEM

There are several problems associated with foreign aid to poor countries. One major issue is that it can create a culture of dependency, where the recipient country becomes reliant on foreign aid and fails to develop its own economy. Additionally, foreign aid can often be misused or siphoned off by corrupt officials, leading to limited impact on the ground. Furthermore, foreign aid can be unpredictable, with fluctuations in funding levels leading to inconsistent support for projects.

#### Case Study:

- According to data from the Organization for Economic Cooperation and Development (OECD), Nigeria received \$3.3 billion in official development assistance (ODA) in 2019, making it the second-largest recipient of ODA in Africa.
- The aid is dispensed through various channels, including government programs, non-governmental organizations (NGOs), and international organizations. However, there have been concerns about corruption and mismanagement in the Nigerian government and aid delivery system, leading to a lack of transparency and accountability in aid distribution.
- Reports indicate that some aid has been consistently misused, diverted, or stolen by corrupt officials, and there have been many instances of aid not reaching the intended recipients. These problems have led to a lack of trust and confidence in the foreign aid system and a need for more effective and transparent mechanisms to ensure that aid reaches those who need it most. This is where blockchain technology, which provides secure and transparent transactions, can potentially play a role in ensuring accountability and effective aid delivery.

#### IV. THE SOLUTION

EAGLE-X seeks to disrupt the impact investing niche by providing a transparent and secure platform for fundraising, tracking, and accountability through the use of blockchain technology, which allows donors to see how their contributions are being used in real-time and over time.

Our platform ensures that donations are delivered directly to the intended beneficiaries, avoiding corruption and misuse of funds.

Through the operations of our registered non-profit, EAGLE-X Impact Foundation (EXIF), the platform will provide access to education, healthcare, and microfinance, which are vital for economic development and supports innovative social impact initiatives by serving as a launchpad for current and new projects. And through these efforts, EAGLE-X can make a significant impact on communities in need, while also disrupting the traditional foreign and corporate aid model.

At EAGLE-X, we believe that education and healthcare are fundamental human rights that should be accessible to everyone, regardless of their socio-economic status. Unfortunately, in many parts of Africa and the world, access to these essential services is limited, particularly for children and women living in poverty. Our approach is to work closely with local communities to identify their most pressing needs and develop sustainable solutions that can have a lasting impact. By empowering individuals and communities, we're not only creating positive change but also building a better future for everyone.

## V. TEAM INFO

EAGLE-X Impact is a Houston TX based digital asset development and management platform that focuses on leveraging the power of blockchain technology for social impact, especially in the delivery of targeted replicable aid (TRA). Our singular goal is to continually innovate methods of harnessing, tokenizing, and monetizing human capacity for kindness and charity. We are developing new initiatives to crowdfund social impact that will address certain aspects of human suffering and alleviate poverty in Africa and globally.

Founder & CEO: ***Oladipupo John Akintoye*** is a Certified and Registered Radiologic Technologist (RT) with an immense passion for compassionate capitalism. He is driven by his love of humanitarianism and philanthropy combined with an appreciation for applied technology to address issues of human suffering and need, especially in Africa. He envisions the effective usage of nascent technologies to alleviate said suffering.

Chief Technology Officer: ***Tunde Adesoye*** is a detail-oriented Infrastructure & IT Ecosystem Engineer with years of experience at Microsoft. He is focused on directing the design, development, and implementation of the EAGLE-X blockchain environment.

Chief Marketing Officer: ***Semira Kuku*** is a versatile and highly driven Product Manager whose expertise in business development, branding, and marketing facilitates the company's social engagement and responsibility. She is in charge of ensuring that our initiatives are of the highest quality by public and governmental standards.

Chief Financial Officer: ***Esther Akintoye*** leverages her MBA in Organizational Leadership and Change to ensure that our company's financial goals and health are fully optimized. Applying her background in economics, finance, data analysis, and continuous quality improvement to EAGLE-X Impact's operations helps to usher our company to the next level in social impact engineering.

We are seeking talents looking for opportunities that enable them to combine blockchain technology with social impact investing effectively. Business development professionals, web developers, blockchain developers, social entrepreneurs, brand and marketing experts, and PR/social media engagement drivers are welcome to join our team.

## VI. TOKENOMICS

### **Token Distribution**

Capped Total Supply: 1,000,000,000,000 GLXE

Team and Advisors: 15% (150,000,000,000)

10% claimable at TGE

90% vested over 24-month period

Public Sale Events: 55% (550,000,000,000)

30% claimable at TGE

70% vested over 12-month period

Marketing and Ecosystem: 5% (50,000,000,000)

Reserve Fund: 10% (100,000,000,000)

Liquidity Provision: 15% (150,000,000,000)

2% Auto-Deflationary Token-burning mechanism (Burnfee)

3% Reflections from Static Staking

*Project Team may conduct scheduled manual token burns as part of the deflationary policy*

### TOKEN SECURITY

Ownable

Pausable

Anti-whale mechanisms/Transfer limits

MultiSig Treasury Wallet

*[Insert data visualizations to reflect tokenomics]*

## VII. EAGLE-X ROADMAP

At EAGLE-X, we are committed to driving the adoption of blockchain technology for social impact. Our roadmap outlines the key milestones on our journey towards creating positive change and empowering communities.

### ☐ Project Conceptualization and Team Formation: Q3 2023

EAGLE-X project was conceptualized, bringing together a team of experts in blockchain technology and social impact. The core team was formed, comprising individuals with a shared vision to make a difference in the world.

### ☐ Research and Development (Phase 1): Q3 2023

Focus on conducting initial research and development, exploring innovative solutions to address the challenges in the social impact space. This phase involves in-depth analysis, technology exploration, and market research to lay the foundation for our project.

### ☐ Token Development and Smart Contract Creation: Q4 2023

Development of GLXE tokens and the creation of a robust and secure smart contract. Our team of experienced blockchain developers ensure the implementation of best practices, ensuring the integrity and reliability of our token.

☐ Marketing and Community Building (Phase 1): Q3 and Q4 2023

Focus shift to building a vibrant and engaged community around the EAGLE-X project. Undertaking comprehensive marketing campaigns, engaging with potential investors, partners, and supporters to spread awareness about our mission and values.

☐ Initial DEX Offering (Presale & Public Sale Series): Q4 2023 - Q1 2024

Series of fundraising events (IDOs) allocating GLXE tokens to the earliest and most enthusiastic investors to build initial liquidity and raise ecosystem development funds.

☐ Launch and Listing on Exchanges: Q1 2024

Official launch of GLXE on major DEXs and listing on reputable CEXs. This phase focuses on the provision of substantial liquidity and accessibility to our community, enabling investors to trade and participate in the EAGLE-X ecosystem.

☐ Establishment of EAGLE-X Impact Foundation (Nigeria Pilot Plan): Q2 2024

Launch EAGLE-X Impact Foundation (EXIF), the non-profit affiliate of EAGLE-X Impact Houston, to kickstart the implementation of the Nigeria Pilot Plan as a test-run for the more encompassing Africa Implementation Plan.

☐ Expansion to Impact Projects: Q3 2024

Looking ahead, our roadmap includes plans to expand our reach and impact by collaborating with impactful projects and organizations. By partnering with like-minded

initiatives, we aim to amplify our social impact and create a network effect that benefits communities globally.

☐ Ecosystem Development and Strategic Partnerships (Phase 2): Q4 2024 - Q1 2025

Further development of the ecosystem to enhance user engagement via staking and liquidity provision. Integrating Web3 functionalities within the platform for interoperability and cross-protocol interaction.

☐ Research and Development (Phase 2): Q3 2025

Advanced and extensive research efforts into developing solutions for corporate and governmental entities to meet ESG and/or CSR goals.

☐ Africa Implementation Plan: Q4 2025 - Q1 2026

Initializing the more encompassing phase of EAGLE-X Impact Foundation social impact and aid delivery initiatives in the Continent.

Through our roadmap, we demonstrate our commitment to transparency, innovation, and creating sustainable social change. Each milestone brings us closer to our vision of leveraging blockchain technology to empower communities and foster positive social impact.

## VIII. BUSINESS MODEL

The EAGLE-X project is a social impact initiative focused on alleviating poverty and providing access to education and healthcare in underprivileged communities in Africa and beyond. Our project will operate through the EAGLE-X Impact Foundation (EXIF), a registered non-profit

organization that will be responsible for the management and implementation of our impact development projects.

EXIF will work closely with local communities and partners to identify their most pressing needs and develop sustainable solutions that can have a lasting impact. We will provide access to education and healthcare, as well as grants for small businesses and scholarships for gifted students. Our initiatives will be funded through the sale of GLXE tokens and donations from individuals and organizations who share our vision.

As a part of our ecosystem development goals, we endeavor to build a decentralized exchange (DEX) platform where investors can conduct various transactions with GLXE and other popular tokens including swapping, staking, yield farming, and liquidity provision. These transactions will generate transaction fees that will be used in supporting EXIF operations in Africa and maintaining the EAGLE-X platform.

A portion of the funds raised from IDOs and scheduled market trades will be allocated towards marketing, community initiatives, and social impact projects. GLXE holders will also receive a 3% reward calculated based on their holdings every time GLXE tokens are transferred, subject to anti-whale regulations (Static Staking - Reflections).

The EAGLE-X project is a revolutionary initiative that uses the power of cryptocurrency and blockchain technology to make a positive difference in the world. Our focus on social impact initiatives and transparency sets us apart in the crypto industry, and we are committed to using our knowledge and expertise to empower communities and create a better future for all. By investing in GLXE, you can join us in this mission and help create a brighter future for underprivileged children in Nigeria, Africa, and beyond.

## IX. Measuring Impact and Social Returns

### **The Power of IMM, TRA, and Two-fold ROI**

In today's rapidly evolving world, where social impact is a paramount concern, organizations are increasingly seeking innovative ways to measure and maximize their effectiveness in driving positive change. At EAGLE-X and the Foundation, our commitment to creating a better future is not only reflected in our mission but also in our rigorous approach to measuring impact and social returns. Through the implementation of Impact Multiple of Money (IMM), Targeted Replicable Aid (TRA), and the Two-fold ROI framework, we strive to ensure transparency, accountability, and tangible results. *[Visit website for details]*

## X. BLOCKCHAIN-DRIVEN SYMBIOSIS

Investors, the EAGLE-X token, and the EAGLE-X Impact Foundation are affiliated entities working in a symbiotic relationship to drive social impact. This dynamic ecosystem fosters a cycle of value creation, where investors support the EAGLE-X project, EAGLE-X generates social impact through its initiatives, and the Foundation ensures the effective deployment of funds. Through our platform, we explore the mechanisms that govern this symbiotic relationship, highlighting how each stakeholder contributes to the advancement of social impact initiatives. *[Visit website for details]*

## XI. FINANCIAL RESPONSIBILITY

### **Facilitating Accountability and Transparency**

In the realm of social impact and blockchain technology, accountability and transparency are paramount. At EAGLE-X, we understand the importance of fostering trust and demonstrating our commitment to financial responsibility. Through a robust framework that encompasses the acquisition and allocation of funds, reporting mechanisms, and the utilization of MultiSig wallets, we strive to provide a transparent and accountable ecosystem that promotes trust and due diligence. *[Visit website for details]*
